GOVERNMENT PRODUCTS & SERVICES

Identify, Quantify and Manage your Risk

Navigating through the procurement process to acquire risk assessment tools and services can be a major roadblock for government organizations and agencies. Huntington Ingalls simplifies this process in two ways:

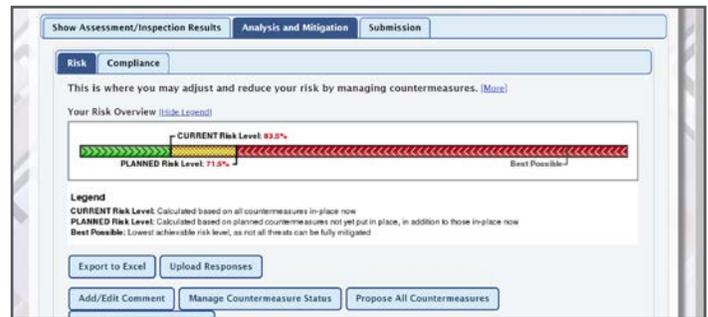

FIRST: We'll custom-tailor our CounterMeasures® tools to fit the exact needs of your organization, fine-tuning it to the way you work and the things you need to protect.

SECOND: We'll help make it easier to acquire; our contracting experts can help ensure that the acquisition process goes smoothly and according to plan.

CounterMeasures is helping DoD and civilian government agencies protect the nation's personnel, assets and critical infrastructure.

Huntington Ingalls has customized solutions for DoD, federal civilian agencies and state and local governments and has supported government versions of CounterMeasures for organizations with up to 3800 active users in the system. Our experts will provide gap analysis, needs identification and requirements scoping, and even develop a mitigation plan.

When you're ready to move forward, you'll appreciate our vast experience in contracts and acquisitions. We

can provide any necessary justification documentation. Huntington Ingalls can support sole-source acquisitions, and regularly submits bids for competitive opportunities in risk assessment, risk management, training and program management.

Once the project is underway, Huntington Ingalls' dedicated project management team will ensure your contracting officer's concerns are addressed in a timely manner, support the implementation and knowledge transfer processes and provide regular updates on the performance of the team and progress on tasks.

About Huntington Ingalls Industries, Technical Solutions:

Building on a legacy of more than a century of naval shipbuilding, Huntington Ingalls Industries' Technical Solutions division provides mission-critical national security solutions to a wide variety of government and commercial customers worldwide. Comprising more than 7,000 professionals worldwide, our unique national security services portfolio includes unmanned systems, nuclear and environmental services, intelligence, surveillance and reconnaissance (ISR), cyber and electronic warfare, live, virtual and constructive (LVC) training solutions, and fleet sustainment and logistics.
