

An online software-as-a-service or custom client-based solution

THE ISC MODULE VARIANT

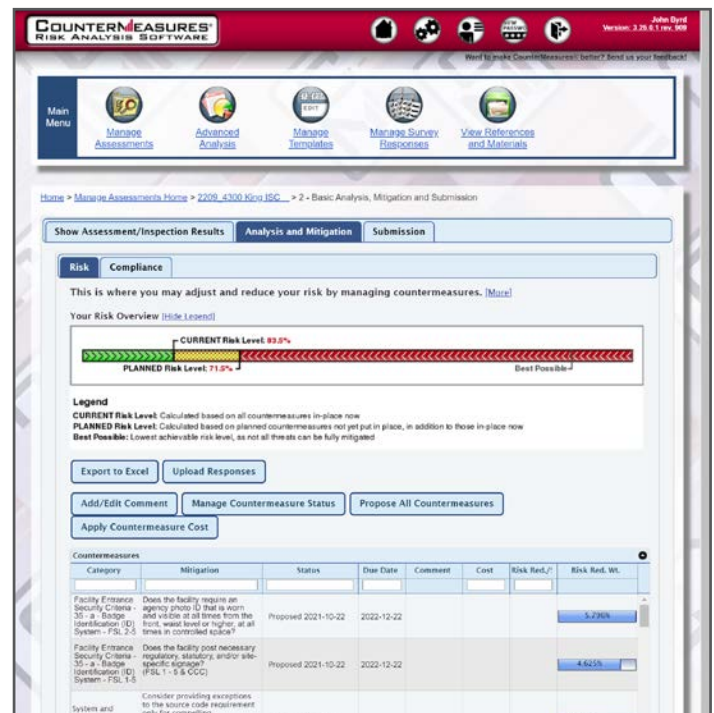

Identify, Quantify and Manage your Risk

CounterMeasures® administers the Interagency Security Council (ISC) Risk Management Process (RMP) and presents results in one simple analysis, identifying areas of wasted resources that can be applied to unmitigated risks. CounterMeasures was certified by the ISC Validation Review Board which determined that it meets all the requirements outlined in the Standard Operating Procedure for Risk and is considered ISC CERTIFIED. For a more comprehensive and granular approach, the software also includes its own analysis, taking a deeper look into the assessment results.

The ISC RMP is intended to be applied to all buildings and facilities in the United States occupied by Federal employees for nonmilitary activities to include: existing owned, to be purchased or leased facilities, stand-alone facilities, Federal campuses, individual facilities in Federal Campuses, and special use facilities.

The RMP, as it is executed within the CounterMeasures ISC Module, defines the criteria and processes that those responsible for the security of a facility should use to determine its facility security level (FSL), and provides an integrated, single source of physical security

countermeasures for all Federal facilities, per the Interagency Security Committee's (ISC) published guidelines.

About Huntington Ingalls Industries, Technical Solutions:

Building on a legacy of more than a century of naval shipbuilding, Huntington Ingalls Industries' Technical Solutions division provides mission-critical national security solutions to a wide variety of government and commercial customers worldwide. Comprising more than 7,000 professionals worldwide, our unique national security services portfolio includes unmanned systems, nuclear and environmental services, intelligence, surveillance and reconnaissance (ISR), cyber and electronic warfare, live, virtual and constructive (LVC) training solutions, and fleet sustainment and logistics.
